
**Subject: M-Series – Unavailability of cutters for
T90**

Date: 23rd Jan 2018**Summary:**

This commercial bulletin informs that cutters for T90 are no longer available, with immediate affect

Priority	Medium
Product range affected	M-Series
Product type affected	12" printers
Circulation	Commercial / Technical / Sales

Introduction

An automatic cutter for the 12" printers (T90) has previously been available as an option. With immediate affect, these are no longer available as an option for new machines, nor as spares.

Information

T90 cutters with article number MT34079 / SP34079 (left hand machines) and MT34719 (right hand machines) are no longer available. The supplier has ended production, and there are no further cutters available. Currently, we have not yet been able to find a replacement article, or alternative source for the cutters. This implies that no further T90 machines with cutters can be ordered. It also implies that we cannot deliver the cutters as spares. If cutter spares are required, please contact DPA TSG (Technical Support Group; Salesforce Queue M04 Tech Support or <http://support.dominopa.com>) and they will support to investigate if the cutter can be repaired.

If you have any queries regarding the above, please feel free to contact us.
